

## Third Grade

# Summer Homework Packet 2023

Dear Parents and Students,

Welcome to the Third Grade! This will be an important school year. In order for children to keep progressing, it is EXTREMELY important that you have your children working a little each day. This summer, please work on multiplication facts with your child. The math curriculum begins with multiplication, so they must know the multiplication facts 1-10 on the first day of school. Students should visit the math websites that they have been working on. It is also important to be reading independently each day. Ask your child questions about what they are reading. Reading every day is the only way to become a better reader.

Please continue using these important websites to support your child...

Help your child create a **SUMMER COLLAGE**. Take pictures of all the fun things that you do with your child. Also, collect brochures, pamphlets, ticket stubs, maps and souvenirs from places that you visit. Place all of those items along with a paragraph about your summer on a small poster (12x18). Nothing larger please!

Please return the completed project on the first day of school. All school supplies are due by the end of the first week. We wish you a safe and fun summer vacation!

Sincerely,  
The Third Grade Teachers
